Section 1—Passenger Services to be Withdrawn.

Section 2—Passenger Services to be Modified.

Section 3 — Passenger Stations and Halts to be Closed — England.

Section 4 — Passenger Stations and Halts to be Closed — Scotland.

Section 5 — Passenger Stations and Halts to be Closed — Wales.

Section 6—Passenger Services already under Consideration for Withdrawal before the Formulation of the Report.

Section 7—Passenger Stations and Halts already under Consideration for Closure before the Formulation of the Report — England.

Section 8—Passenger Stations and Halts already under Consideration for Closure before the Formulation of the Report — Scotland.

Section 9—Passenger Stations and Halts already under Consideration for Closure before the Formulation of the Report — Wales.

PASSENGER SERVICE, LINE AND STATION CLOSURES

As soon as the required procedure permits, it is desired to withdraw those passenger train services which are clearly uneconomic. The procedure to be followed is laid down in Section 56 of the Transport Act, 1962. Schedules of the services to be withdrawn or modified, including those which were under consideration in August 1962 and have since been withdrawn in part, are given in Sections 1, 2 and 6 of this Appendix. Other Sections give lists, in alphabetical order, of the stations and halts which, as a consequence, will be closed to passengers.

In most cases there will eventually be no passenger service of any description over the lines affected. In others, fast and semi-fast services using the same routes will continue to run. In still other cases it is intended to modify the pattern of services, both stopping and fast, in ways which will reduce the train mileage and cut out the more uneconomic portions of services and under-utilised stations.

The number of stations and halts which will be closed is 2,363, including 435 under consideration before the Report appeared. Of these, 235 have already been closed. Services will be completely withdrawn from about 5,000 route miles. The extent of the complete withdrawals is shown on Map No. 9. When services are to be modified, these are shown on Map No. 10. Changes proposed in the London area are shown on Map No. 9A.

Comparisons with passenger density Map No. 1, and with Map No. 3 giving density by station receipts, show the extent to which the proposed withdrawals and modifications are related to the least used lines and stations.

These proposals do not include all the stopping passenger services now running. Reshaping and streamlining the pattern of these services must be a continuing process. As this proceeds other services and stations will be added to the withdrawal and modification lists until a point is reached when what remains can be said to be viable.

Examples of the assessments made of the annual revenue and expenses, associated with a variety of passenger services, are given in Table No. 1, and in the following paragraphs particular services, and their contribution, have been described in some detail.

Gleneagles - Crieff - Comrie

This is a rural service of ten trains a day in each direction. There is an element of summer holiday traffic. The service is operated by diesel rail bus on weekdays only over a distance of 15 miles. Connections are made at Gleneagles with main line trains to and from Glasgow and Edinburgh. The stations served are:—

Gleneagles	Highlandman
Tullibardine	Pittenzie Halt
Muthill	Crieff
Strageath Halt	Comrie

All stations except Gleneagles would be closed to passengers.

Some 340,000 passenger miles accrue to this service which accounts for 65,000 train miles a year. On average, there are 5 passengers on a train at any one time. Earnings are £1,900 and these represent little more than a quarter of the train movement expenses of £7,500. Station terminal expenses bring the total of direct expenses to nearly £11,000, less than a fifth of which is covered by the earnings of the service. When track and signalling expenses are added—£8,200—the total expenses are ten times as great as the earnings of the service.

Passengers using this service in combination with other services contribute more than £12,000 to the earnings of other rail services, and it is estimated that withdrawal of the service would result in the loss of £9,000 of this contributory revenue. Because there would be no alternative rail service on this line after withdrawal, none of the earnings on the service would be retained.

Despite the estimate of contributory loss, which is probably high, bearing in mind that holidaymakers may travel elsewhere, the overall net financial improvement expected from withdrawal is nearly £8,400, or more than two-fifths of the present level of total direct expenses attributable to the service.

Thetford - Swaffham

This is a rural branch service covering 23 route miles and connecting at Thetford with main line services from Liverpool Street. The stations served are:—

Thetford	Wretham and Hockham
Stow Bedon	Holme Hale
Watton	Swaffham

Thetford and Swaffham would remain open after withdrawal of the service. On weekdays, five trains a day in each direction are worked by diesel multiple units over the whole route, and one a day between Thetford and Watton.

The train miles are 86,000 and, on average, there are 9 passengers on a train. The earnings are £3,700, the movement expenses amount to £13,200, and the terminal expenses to a further £3,900.

The shortfall of earnings on the movement and terminal expenses is £13,400, equivalent to more than three-quarters of these expenses. In addition, the track and signalling expenses which could be saved by the withdrawal of the service amount to £17,200, increasing the shortfall to £30,600. Put another way, the earnings on the service cover roughly one-tenth of the total direct expenses.

The gross revenue accruing to other services, contributed by passengers using the Thetford - Swaffham service on part of their rail journey, amounts to some £16,000. Allowance must be made for the loss of £1,700 of this contributory revenue and, taking this into account, it is estimated that the loss in gross revenue will be £5,400.

The estimated net financial improvement in revenue which would result from the withdrawal of the service amounts to about £29,000, equivalent to over four-fifths of the total direct expenses.

Hull- York via Beverley

This is a stopping service over a distance of 42 miles, serving a rural area between the cities of Hull and York, and with an element of commuter traffic at each end. The stations served are:—

Londesborough	Hull
Pocklington	Cottingham
Stamford Bridge	Beverley
Earswick	Kipling Cotes
York	Market Weighton

All intermediate stations except Cottingham and Beverley would be closed.

Nine trains run in each direction on weekdays and most of them are composed of diesel multiple units.

In a year the service involves 260,000 train miles. On average, there are 57 passengers on a train. The earnings of the service are £90,400, and cover the movement expenses of £84,400. Terminal expenses bring the total of movement and terminal expenses to £107,500, so that earnings show a shortfall of £17,100. It is estimated that withdrawal of the service would reduce track and signalling expenses by £43,300. Thus, on total direct expenses of £150,800, earnings show a shortfall of £60,400, equivalent to two-fifths of total direct expenses.

Because alternative services would be available after withdrawal of the service, £25,600 of the present earnings would be retained. It is estimated that passengers using the service as part of their rail journey contribute £37,700 to the revenue of other services. Because of the existence of services between Hull and York via other routes, only £4,900 of this amount is expected to be lost.

The total loss in gross revenue resulting from withdrawal of the service is estimated at £69,700, but the overall net financial improvement is expected to be £81,000, equivalent to over half of the total direct expenses.

Table No. 1

Region	Service	Traction	Type of service	Route miles	Train miles '000	Earnings £		Contributory gross revenue£		Expected loss in total gross revenue £	Movement expenses		Net financial effect based on movement expenses £	Terminal expenses £	Total movement and terminal expenses £	Net financial effect based on total movement and terminal expenses £	Direct track and signalling expenses £	Net financial effect based on total direct expenses £

Scottish	Gleneagles-Crieff-Comrie	Diesel rail bus	Holiday/rural	15	65.1	1,900	1,900	12,280	9,000	10,900	7,500	2 4	-3,400	3,480	10,980	+80	8,280	+8,360

The heavy vertical lines indicate the stage in the relationship between revenue and expenses at which withdrawal of the service becomes financially justified. The direct track and signalling expenses shown above are the additional expenses incurred in providing track and signalling to passenger train standards for the services concerned.
